SUMMARY

Software developer focused on **web and mobile** applications, working professionally since 2022. I take part in the whole development cycle, with solid experience in **Java (Jakarta EE)**, JSF, PostgreSQL, MongoDB and RabbitMQ on the back end, and **Flutter**, **React** and **Next.js** on the front end and mobile. I aim for robust, scalable, user-centered solutions.

EXPERIENCE

Software Engineer · Mertins Tecnologias

Apr 2022 – Present

- Build and maintain MVC systems with Jakarta EE, with front ends in JSF (JavaServer Faces).
- Persistence with PostgreSQL and MongoDB; queues and service-to-service messaging with RabbitMQ; REST API integrations.
- Mobile app development with Flutter.
- Mentor interns and foster a collaborative, continuous-learning environment.

Frontend Engineer · Noticiato

Sep 2024 – Apr 2025

- Built and maintained modern, responsive interfaces with HTML, CSS, JavaScript, React and Next.js.
- Focused on user experience and performance, working closely with designers and back-end teams.

PROJECTS

Libras Go

3D endless-runner mobile game that teaches Brazilian Sign Language (LIBRAS) through gameplay, with vocabulary-themed levels.

Unity · C# · Supabase

JoinMe

in development

App for amateur sports: connects players, organizes matches and manages courts. Android and iOS.

Flutter · Dart · Java

Formatta.aq

in development

Platform that automatically formats documents to academic standards such as ABNT and APA.

Next.js · React · Tailwind · Firebase

Steam Watcher

App that tracks Steam games and sends real-time update notifications, with its own back end.

Flutter · Spring Boot · Steam API

SKILLS

Back-end

Java Jakarta EE Spring Boot JSF REST APIs RabbitMQ

Front-end

React Next.js TypeScript JavaScript Tailwind CSS HTML/CSS

Mobile

Flutter Dart Firebase

Data

PostgreSQL MongoDB Firebase Supabase

Tools

Git Docker JUnit Unity

EDUCATION

B.Sc. in Computer Science · Federal University of Pelotas (UFPEL)

2019 – 2026
